FreedomPACS cloud storage helps your business

Security

Your business manages sensitive data: private, government-protected patient radiology images and related physician reports. Protect these vital assets from natural disasters, competitors, and hackers with cloud server storage. Your data is stored in a highly secure off-site location where it is safe.

Instant Access

By storing your images in the cloud, each file is immediately available to all health care providers treating a given patient. It's a hassle-free, secure way to share information and improve patient care.

Easy set-up and budgeting

Save time and money with the easy set-up and maintenance of cloud off-site storage. You'll be free from manual and complex tape back-ups, costly downtime, and unpredictable IT service fees.

## Regulatory Compliance:

HIPAA & the Electronic Medical Records Mandate

As a healthcare provider, you are faced with complex HIPAA security standards for patient record storage and retrieval. HIPAA regulations require healthcare providers to have an off-site, daily data backup (encrypted for privacy) and a contingency plan to meet the mandated administrative procedures. By using our cloud storage, you can offload the burden of your security and privacy requirements to us. Your data will always be secure whether its being transmitted, stored and accessed; your business will be one step closer to HIPAA compliance.

About FreedomPACS

FreedomPACS brings together the technology expertise of medical software developers and the clinical experience of practicing physicians to provide affordable, efficient, leading edge medical software solutions to its customers.

Key Features

- Web-based diagnostic DICOM viewer
- Apps for iPad & Android
- All modalities (Mammography DICOM only)
- Patient Information Center
- Built-in workflow engine
- Viewing protocols
- PET/CT Fusion
- Probe & ROI Measurements
- Customizable worklists
- Study grouping
- DICOM modality worklist
- DICOM routing/printing
- Worklist and study alerts
- Compare current/prior studies
- CD/DVD Burning
- Image enhancement tools
- Management reports (customization available)
- Audit trails
- Referring physician
- Referring facilities integration available
- Voice recognition integration
- Digital dictation/transcription integration available
- Digital signature

Save money.

Affordable web-based PACS

Looking for a digital imaging PACS that won't break the bank? FreedomPACS enables you to boost your productivity with a web-based PACS for thousands less than many competing systems.

- No licensing limitations
- No extra costs for number of users
- No limits on storage capacity size
- HIPAA and FDA compliant; avoid hefty fines with off-site storage
- Save on IT services and labor for data back-up and recovery
- Avoid expensive hardware and software fees

Save time.

Efficient workflow

Eliminate time-consuming steps and administrative headaches by integrating your radiology images in a single electronic platform.

- Fast, efficient workflow for office staff and physicians
- Simply log into secure web application and review images with diagnostic viewer
- Find studies quickly with multiple search categories
- Gather global worklists from disparate PACS
- Interfaces with other medical or PACS systems (HIS, EMR, RIS)

Save space.

Access any time, any place

Whether it's your computer or iPad, you have rapid and secure access to patient images. And with our cloud storage, rest easy knowing your vital data is safe.

- Supports: PC, MAC, iPad, Android devices and workstations
- Instant access to patient images from any Internet connection
- Cloud technology for secure SSL off-site storage of patient images
- No more hand-labeled CDs or storage of system backups
- Eliminate radiology film storage
- Secure and robust

How can a PACS System help you?

A Picture Archiving and Communication System (PACS) provides economical storage and convenient access to electronic medical images and reports.

- Save thousands in film, chemicals, labor and space
- Removes physical and time obstacles in traditional film-based image distribution, including filing and retrieving
- Deliver timely, efficient access to images and interpretations

Benefits of FreedomPACS

- Affordable
- HIPAA and FDA Compliant
- Diagnostic web viewer
- Secure, off-site storage of patient images
- Mobile access with iPad and Android apps
- Cloud or server-based storage options
- Archives images from DICOM modality sources (CR, DR, MRI, CT, Angiograms, Digital X-rays, Ultrasound, PET, Vascular Medicine and Mammography)

FreedomPACS
Medical images. Any time. Any place.
